these proceedings reflect the special session on experimental mathematics held january 5 2009 at the joint mathematics meetings in washington dc as well as some papers specially solicited for this volume experimental mathematics is a recently structured field of mathematics that uses the computer and advanced computing technology as a tool to perform experiments these include the analysis of examples testing of new ideas and the search of patterns to suggest results and to complement existing analytical rigor the development of a broad spectrum of mathematical software products such as mathematica and maple has allowed mathematicians of diverse backgrounds and interests to use the computer as an essential tool as part of their daily work environment this volume reflects a wide range of topics related to the young field of experimental mathematics the use of computation varies from aiming to exclude human input in the solution of a problem to traditional mathematical questions for which computation is a prominent tool

this volume constitutes the thoroughly refereed post conference proceedings of the 7th international conference on mathematical methods for curves and surfaces mmcs 2008 held in tønsberg norway in june july 2008 the 28 revised full papers presented were carefully reviewed and selected from 129 talks presented at the conference the topics addressed by the papers range from mathematical analysis of various methods to practical implementation on modern graphics processing units

includes articles as well as notes and other features about mathematics and the profession
